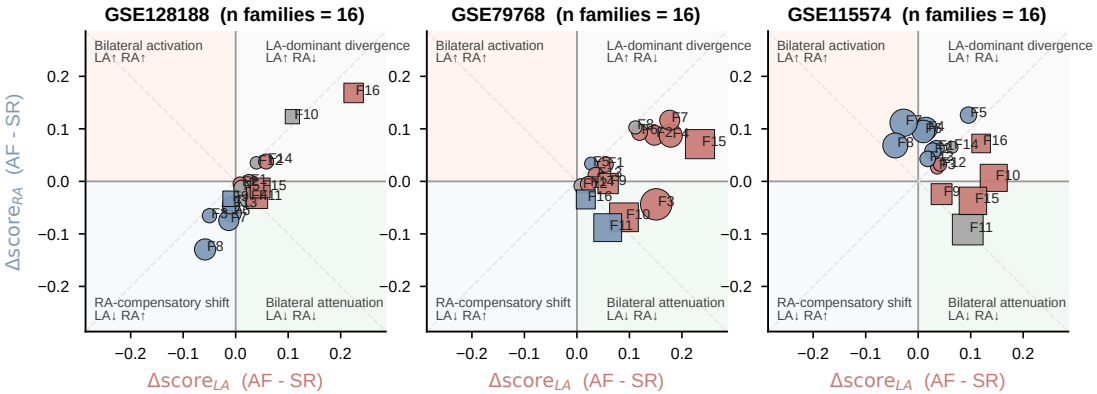
Fig 2D Chamber decomposition of AF rewiring (family-level mechanism direction)



Mechanism legend

- LA-driven
- RA-driven
- Bilateral

Bubble size = |Δ*aCAI*|

- 0.06
- 0.14
- 0.23

Baseline direction marker

- LA-biased family
- RA-biased family

Diagonal guides

y = x : symmetric co-shift
y = -x : antagonistic shift

Driver counts by cohort

GSE128188: LA 6 | RA 6 | Bi 4

GSE79768: LA 11 | RA 3 | Bi 2

GSE115574: LA 6 | RA 8 | Bi 2

Each point is one family in one cohort. x = Δscore_LA, y = Δscore_RA (AF - SR). Point color denotes dominant chamber source (|LA| >= 1.25|RA|: LA-driven; |RA| >= 1.25|LA|: RA-driven; else bi
