e baseline panel stability under healthy resampling perturbation
panel-member baseline stability profile (K=30)
GAG metabolism diseases
BMP signalling
HS-GAG metabolism
NTRK2 / TrkB signalling
Mito translation
TCA cycle
Adipogenesis
Translation (cyto)
Mito proteostasis
Complex I biogenesis
Mito β-oxidation
Mito protein import
Protein localization
BCAA catabolism
OXPHOS
ETC
RUNX2 / bone dev.
Class B/2 Secretin receptors
Complex IV assembly
TG metabolism
FA metabolism
Ribosome QC (RQC)
Complex III assembly
Mito Ca²⁺ transport
rRNA processing
tRNA aminoacylation
Amino-acid metabolism
Eukaryotic translation init.
TGF-β signalling (Hall)
Keratan sulfate biosynth.
