Innovation robustness: pathway selection frequency
ETC
OXPHOS
Mito translation
Mitochondrial translation elongation
Aerobic resp / ETC
TCA cycle
Complex I biogenesis
Mito proteostasis
Translation (cyto)
Adipogenesis
Protein localization
Mito protein import
Mito beta-oxidation
BCAA catabolism
HS-GAG metabolism
NTRK2 / TrkB signalling
BMP signalling
GAG metabolism diseases
HS-GAG biosynthesis
RUNX2 / bone dev.
RUNX2 / osteoblast diff.
Class B/2 Secretin receptors
Complex IV assembly
TG metabolism
TCA enzyme maturation
FA metabolism
Ribosome QC (RQC)
Complex III assembly
Mito Ca2+ transport
rRNA processing
SRP cotranslational targeting
tRNA aminoacylation
Amino-acid metabolism
TG catabolism
Mito tRNA aminoacyl.
Eukaryotic translation init.
