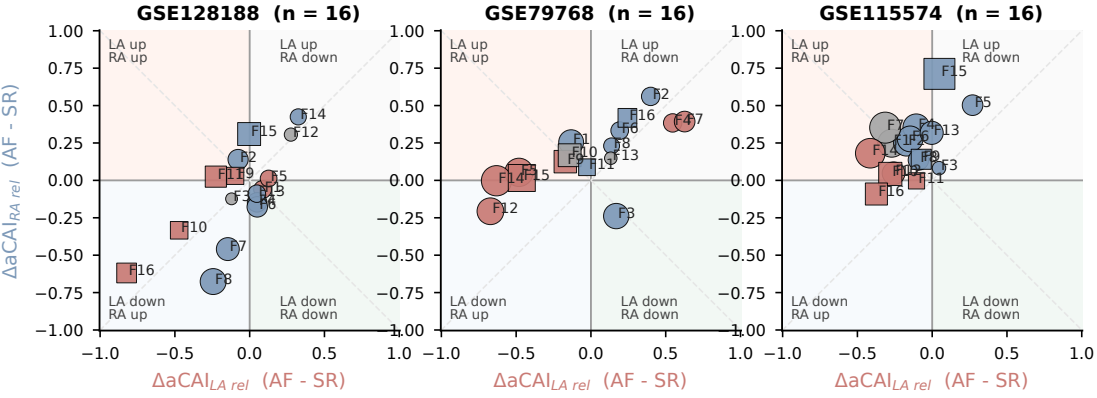
Chamber contribution to AF-associated NCP family rewiring



Chamber source

- LA-dominant
- RA-dominant
- Bilateral

Bubble size = $|\Delta aCAI_{rel}|$

- 0.21
- 0.49
- 0.82

Baseline direction marker

- LA-biased family
- RA-biased family

Diagonal guides

y = x : symmetric co-shift
y = -x : antagonistic shift

Source counts by cohort

GSE128188: LA 6 | RA 8 | Bi 2

GSE79768: LA 7 | RA 7 | Bi 2

GSE115574: LA 5 | RA 9 | Bi 2

Each point is one family in one cohort. x = ΔaCAIrel_LA, y = ΔaCAIrel_RA (AF - SR). Point colour denotes the dominant chamber contribution (|LA| ≥ 1.25|RA|: LA-dominant
